

WorkSync

User Manual

1. Introduction

WorkSync is a mobile application that helps organizations track employee attendance, assign and manage tasks.. There are two types of users:

- Employee — marks attendance, views and updates assigned tasks and receives notifications.
- Manager — does everything an Employee can do, plus manages the employee directory, creates and assigns tasks.

The features visible in the app automatically adjust based on your role after logging in.

2. Getting Started

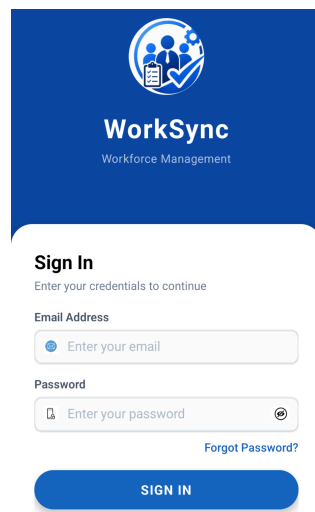

2.1 Installing the App

Install the WorkSync debug APK onto an Android device, or run the app from a development environment as described in the Setup Guide. Open the app once installed.

2.2 Logging In

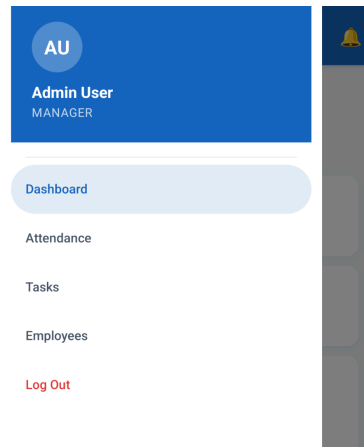

On first launch you will see the Login screen.

- Enter your registered email address and password.
- Tap the login button to sign in.
- If your email or password is incorrect, an error message is shown and you can try again.
- Once logged in, your session is saved on the device so you won't need to log in again each time you open the app.

2.3 Logging Out

Open the side navigation drawer (tap the menu/hamburger icon in the top-left corner of most screens) and select Logout to end your session and return to the Login screen.

3. Navigating the App

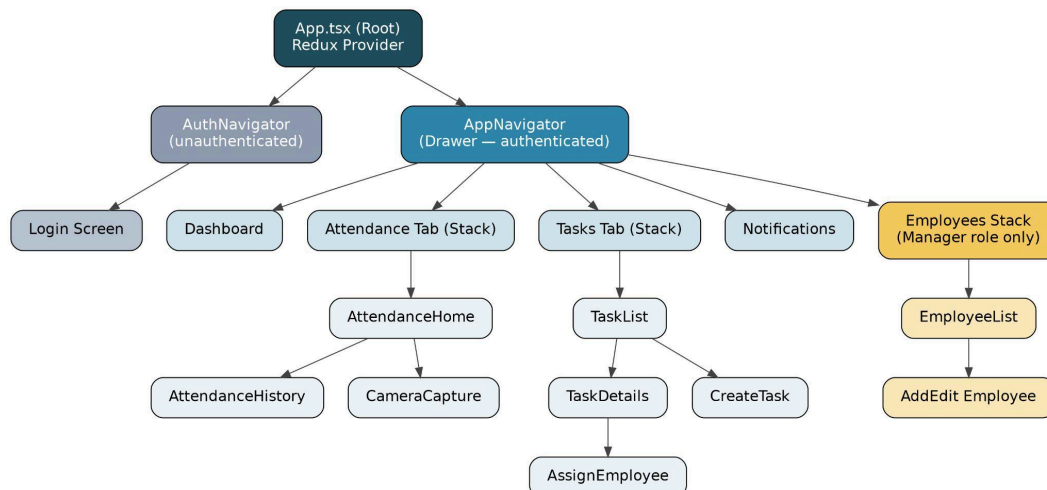

After logging in, WorkSync uses a side drawer menu for navigation. Tap the menu icon in the header to open it. The drawer contains:

- Dashboard
- Attendance
- Tasks
- Employees (visible to Managers only)

A Notifications bell/badge is accessible from the app header on the dashboard page and shows your unread notification count.

The diagram below shows how the screens connect to each other:

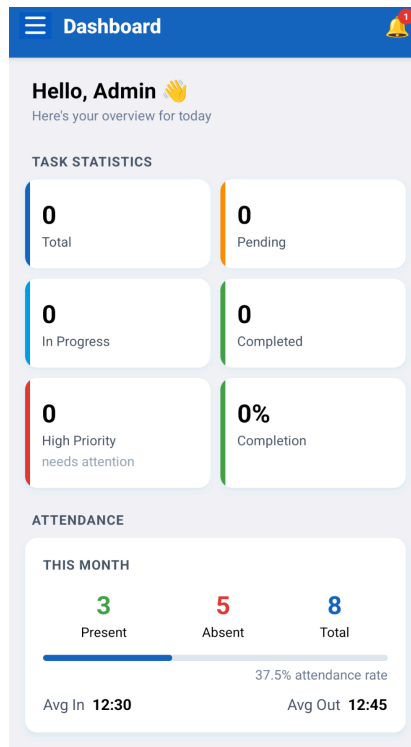

4. Dashboard

The Dashboard is the home screen after login. It gives an at-a-glance productivity overview, including:

- Task statistics — total, pending, in-progress, and completed task counts, number of high-priority tasks, and overall completion rate.
- Attendance summary — total working days, present/absent days, attendance rate, and average check-in/check-out times.

Managers see an organization-wide summary; Employees see a summary scoped to their own activity.

5. Attendance

The attendance screen has a blue header with a hamburger menu and the title 'Attendance'. It contains three main sections. The first section, 'ATTENDANCE PHOTO (OPTIONAL)', has a light blue button with a camera icon and the text 'Take Photo'. The second section, 'TODAY'S STATUS', shows 'Not Checked In' and a large blue button labeled 'Check In'. The third section is a white button with the text 'View Full History'.

ATTENDANCE PHOTO (OPTIONAL)

Take Photo

TODAY'S STATUS

Not Checked In

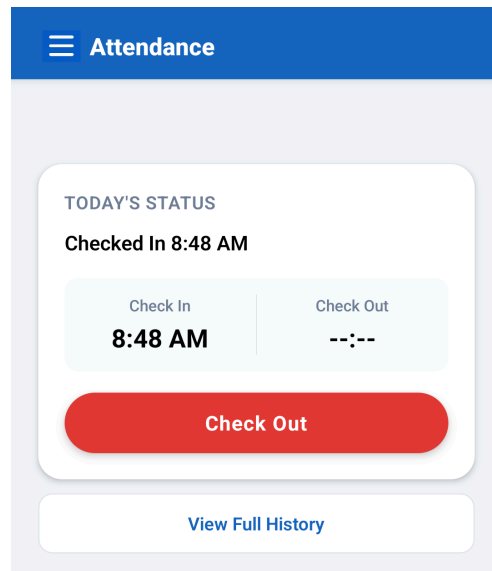

Check In

View Full History

5.1 Checking In

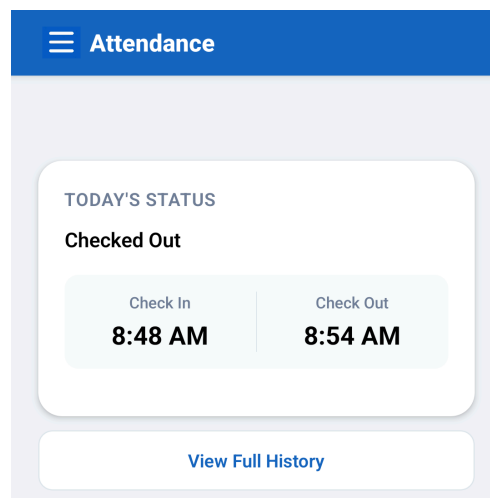

Go to the Attendance tab from the drawer menu. From the Attendance Home screen:

- Tap Check In to mark the start of your workday.
- If location capture is enabled for your check-in, the app will request your current GPS location and may prompt you to take a photo using the in-app camera capture screen.
- A confirmation is shown once check-in succeeds.

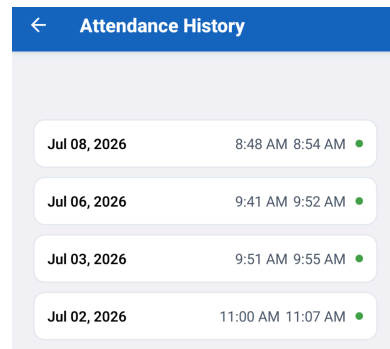

5.2 Checking Out

- Tap Check Out from the same screen to mark the end of your workday.
- You can only check out after a check-in has been recorded for the day.

5.3 Viewing Attendance History

Tap Attendance History from the Attendance tab to see a list of your past check-ins and check-outs.

5.4 Working Offline

If you try to check in or out without an internet connection, WorkSync saves the action locally on your device instead of losing it. Once you're back online, you can retry the save from within the app so the record reaches the server.

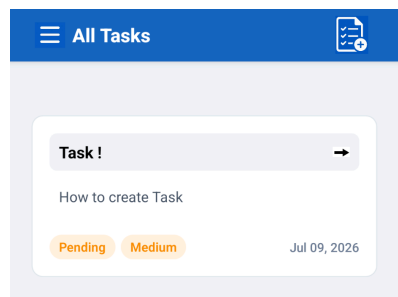

6. Tasks

6.1 Viewing Your Tasks (Employee)

Open the Tasks tab to see My Tasks — a list of tasks assigned to you. Each task card shows the title, priority, status, and due date. Pull down on the list to refresh it. If you have no tasks, an empty-state message is shown instead of a blank screen.

6.2 Viewing Task Details

Tap any task card to open Task Details, where you can

- Read the full task description, priority, status, and due date.
- Update the task's status (e.g. move it from Pending to In Progress to Completed) as you make progress.
- View and add comments — use comments to communicate progress, questions, or blockers with your manager and teammates.

6.3 Creating a Task (Manager)

From the Tasks tab, Managers can tap Create Task button in the right to open a form where they enter:

- Title and Description
- Priority (Low, Medium, or High)
- Status (Pending, In Progress, or Completed)
- Due Date

All fields are required; the form validates entries before the task can be saved.

SAVE TASK

After creation of task a list of tasks comes click on it and it opens the task description page

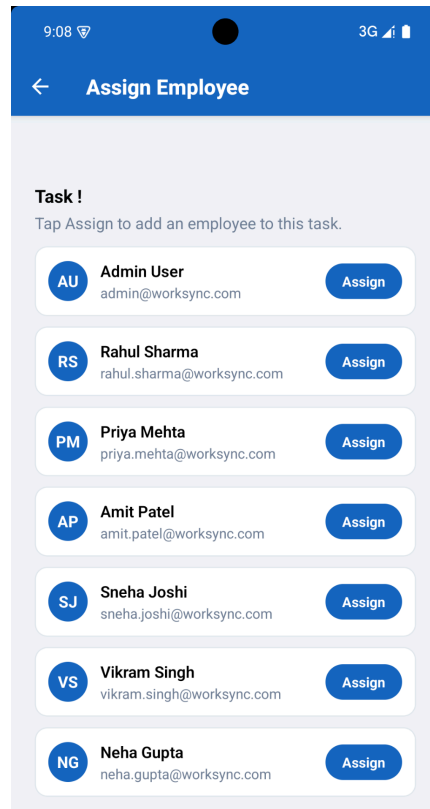

6.4 Assigning a Task (Manager)

From a task's details, Managers can open Assign Employee by clicking on the button shown and to choose which employee(s) the task should be assigned to. Managers can also unassign a task from an employee if plans change

After clicking the button this page opens, Click on the Assign button to assign employee this task

After this return to the task description page there we can see assigned employees in the ASSIGNED EMPLOYEES Section. User can also remove the assigned employee from the task by clicking on the delete button.

6.5 Task Comments

Any user involved in a task can add a comment (up to 1000 characters) from the Task Details screen here type the comment in the pane and then click the send button..

After the comment is sent it is showed in COMMENTS Section:

7. Camera & Photo Uploads

Certain workflows — most notably attendance check-in — let you capture a photo directly within the app using the Camera Capture screen:

- Tap the camera option when prompted (e.g. during check-in).
- Take a photo or select one, then preview it before confirming.
- Confirm to upload the photo; it is attached to the related record (e.g. your attendance entry).

If the upload fails, you'll see an error message and can retry.

8. Location Capture

For field employees, WorkSync can capture your device's current location at check-in time and attach it to the attendance record in the database. You may be prompted to grant the app permission to access your device's location the first time this feature is used — allow this permission for location capture to work.

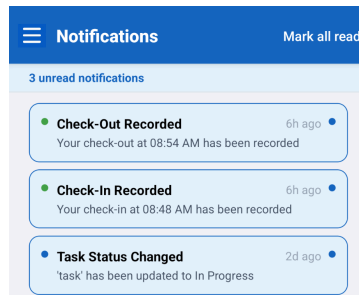

9. Notifications

To open the Notification Screen click the bell icon on the dashboard page:

The Notifications screen lists updates relevant to you, such as new task assignments or attendance-related alerts.

- Unread notifications are visually distinguished and counted in the badge shown on the app header.
- Tap a notification to mark it as read.
- Use the Mark All Read option to clear the entire unread count at once.

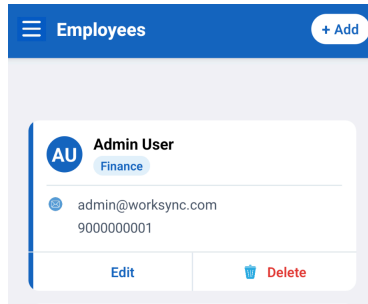

10. Employee Management (Manager Only)

Managers have access to an Employees section from the drawer menu.

10.1 Viewing Employees

The Employee List screen shows all employees as cards, including their department. Loading and empty states are shown appropriately while data loads or if no employees exist yet.

10.2 Adding an Employee

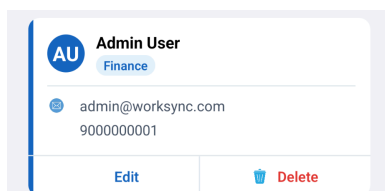

Tap the Add button in the header to open the Add/Edit Employee form. Enter:

- Name
- Email
- Phone
- Department

A screenshot of the "Add Employee" form. The title "Add Employee" is in white on a blue background, with the subtitle "Create a new employee record" below it. The form contains four input fields: "Name" (placeholder "Enter name"), "Email" (placeholder "Enter email"), "Phone" (placeholder "Enter phone number"), and "Department" (a dropdown menu currently showing "HR"). At the bottom is a large blue button labeled "SAVE EMPLOYEE".

10.3 Editing an Employee

Tap an existing employee card to open the same form pre-filled with their details, make changes, and save.

11. Understanding Roles & Permissions

Feature	Employee	Manager
Mark attendance (check-in/out, history)	Yes	Yes
View own tasks & update status	Yes	Yes
Add task comments	Yes	Yes
Upload photos (camera)	Yes	Yes
View own dashboard summary	Yes	Yes
Receive notifications	Yes	Yes
View organization-wide dashboard	No	Yes
Create / assign tasks	No	Yes
Manage employees (add/edit)	No	Yes

12. Troubleshooting for Users

Issue	What to try
Can't log in	Double-check your email and password; contact your administrator if you believe your account details are wrong
"Duplicate Email" when adding an employee	Search the employee list — an employee with that email already exists
Check-in/check-out not saving	Confirm you have a network connection; if offline, the app saves your attendance locally — retry once you're back online
No tasks showing	You may not have any tasks assigned yet; pull down to refresh the list
Notifications badge not updating	Open the Notifications screen to refresh, or mark items as read
Camera or location not working	Check that the app has camera and location permissions enabled in your device settings

13. Getting Help

For issues not covered in this manual, contact your system administrator or refer to the project's Setup Guide and API Documentation for technical details.
